

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

Please amend the claims as follows:

1. (Currently Amended) A method comprising:

presenting a graphical user interface (GUI) for a capture system, wherein the GUI comprising comprises one or more views including:

a search editor view to enable parameters of a search of tags of objects captured by the capture system to be defined, the capture system to intercept and store network transmitted objects according to a capture rule; and

a capture rule view to enable parameters of the capture rule to be defined.

2. (Currently Amended) The [[GUI]] method of claim 1, wherein the parameters definable through the search editor view include both indexed and non-indexed search criteria.

3. (Currently Amended) The [[GUI]] method of claim 1, wherein the definable search editor view parameters include one or more of a plurality of search criteria, the search criteria comprising:

a content type,  
a protocol,  
a keywords,[[;]] and  
a word patterns.

4. (Currently Amended) The [[GUI]] method of claim 3, wherein the search criteria further include a source address, a destination address, a size range, and

a temporal range.

5. (Currently Amended) The [[GUI]] method of claim 1, wherein the definable parameters of the search editor view specify one or more of a plurality of search criteria, the search criteria comprising:

- an email source,
- an email destination,
- an email carbon copy,
- an email subject, and
- message keywords.

6-21. (Canceled)

22 – 24. (Withdrawn)

25. (Currently Amended) The [[GUI]] method of claim 1, wherein the search is of tags of stored objects.

26. (Canceled)

27. (New) A computer readable medium having stored thereon data representing instructions that, when executed by a processor, cause the processor to perform operations comprising:

- presenting a graphical user interface (GUI) for a capture system, wherein the GUI comprises one or more views including:

- a search editor view to enable parameters of a search of tags of objects captured by the capture system to be defined, the capture system to intercept and store network transmitted objects according to a capture rule;

- a capture rule view to enable parameters of the capture rule to be defined.

28. (New) The computer readable medium of claim 27, wherein the parameters definable through the search editor view include both indexed and non-indexed search criteria.

29. (New) The computer readable medium of claim 27, wherein the definable search editor view parameters include one or more of a plurality of search criteria, the search criteria comprising:

- a content type,
- a protocol,
- a keyword, and
- a word pattern.

30. (New) The computer readable medium of claim 29, wherein the search criteria further include a source address, a destination address, a size range, and a temporal range.

31. (New) The computer readable medium of claim 27, wherein the definable parameters of the search editor view specify one or more of a plurality of search criteria, the search criteria comprising:

- an email source,
- an email destination,
- an email carbon copy,
- an email subject, and
- message keywords.

32. (New) The computer readable medium of claim 27, wherein the search is of tags of stored objects.
